

Handwriting Font Template

IMPORTANT - WRITE EACH CHARACTER CONSISTENTLY

- Keep the paper flat. Use the same pen and the same writing style on every page.
- Write each character ONCE, clearly and naturally. Do not add decorative variations.
- Write naturally, but do not rotate the character inside its box.
- Keep the same writing angle / slant throughout the entire sheet.
- Rest the bottom of normal letters ON the solid blue BASELINE.
- Keep lowercase letters approximately at the X-HEIGHT line.
- Keep uppercase letters approximately at the CAP-HEIGHT line.
- Send ascenders (b d f h k l t) up to the same ascender guide.
- Send descenders (g j p q y) down to the same descender guide.
- Do not make characters unnecessarily large or small.
- Do not touch the box borders - leave a small, even margin around each character.
- Do NOT vertically centre punctuation. Follow the printed punctuation guides.
- The period sits ON the baseline. The comma drops BELOW it.

UPPERCASE sit on the baseline, tops reach the cap-height line

A	B	C	D	E	F	G	H	I	J
K	L	M	N	O	P	Q	R	S	T
U	V	W	X	Y	Z				

LOWERCASE body reaches the x-height line; ascenders and descenders use their guides

a	b	c	d	e	f	g	h	i	j
k	l	m	n	o	p	q	r	s	t
u	v	w	x	y	z				

Handwriting Font Template

NUMBERS one common baseline and one common number height

0	1	2	3	4	5	6	7	8	9

PUNCTUATION do NOT centre these vertically - follow the baseline

.	,	;	:	!	?	'	"	`	

PUNCTUATION POSITION

- period . sits ON the baseline.
- comma , starts at the baseline and its tail drops BELOW it.
- semicolon ; dot above the baseline, tail below it.
- colon : two dots between the baseline and the x-height line.
- ! and ? stand on the baseline and rise to about the x-height line.
- ' " ` sit high, just under the cap-height line - they do not touch the baseline.

BRACKETS extend a little above and below the letter zone

(	)	[	]	{	}				

SCANNING REQUIREMENTS

- Scan or photograph the sheet straight-on, with the whole page visible.
- Do not crop individual boxes. Keep all four corner markers in frame.
- Use even lighting. Avoid shadows and glare.
- Avoid perspective distortion - hold the camera parallel to the page.
- Keep the page flat and unfolded.
- Use the same resolution for every page. 300 dpi greyscale or colour is ideal.

Page 3 of 4 - mathematical and special symbols

centre these on the x-height line - they are not letters

MATHEMATICAL SYMBOLS these may run taller than a letter - that is correct

GREEK lowercase to the x-height line, capitals to the cap-height line

ARROWS AND SPECIAL CHARACTERS

SUPERSCRIPT / RAISED POWER write inside the small raised box - not on the baseline

Write the raised digit inside the small blue box only.
The solid line below it is the normal text baseline, shown for reference - do not write on it.
This is what tells the font how high, and how small, a superscript should be in your handwriting.
The caret ^ is collected as an ordinary symbol above.

Handwriting Font Template

Page 4 of 4 - typographic reference (do not write on this page)

THE WRITING SYSTEM every box on pages 1-3 uses these same five lines

SUPERSCRIPT ZONE raised powers are smaller, and sit high

The superscript is roughly half the height of a normal letter and its foot sits near the x-height line.
